	Mumbai

Projects

GoFood

- It is a MERN stack food delivery website which has add to cart functionality,checkout functionality and the CRUD functions in it and also for making the password encrypted i have used BCRYPT library of react also i have used the JWT authtoken method
- **TechStack**: MongoDB , ExpressJS , ReactJS , NodeJS , HTML , CSS ,JS
- Link: **https://github.com/Sunitsable/GoFood**

Full Stack Decentralized Voting System

- It is a blockchain based project which is based on solidity,ethers.js,hardhat .Each user can vote only once and the vote is registered in the hardhat blockchain .Ive used metamask wallet here and a localhost custom test net
- TechStack:HTML ,CSS , JS , Solidity, ReactJS,Node.js,Ethers.js,Hardhat
- Link: **https://github.com/Sunitsable/Full-Stack-Decentralized-Voting-System-**

To Do List

- **It is a Todo list which checks tasks and makes its text decoration as line through,if u want to delete the task there is a button to delete,also there is add todo button which creates a popup to add todos using MERN stack**
- **TechStack:MongoDB , ExpressJS , ReactJS , NodeJS , HTML , CSS ,JS**
- **Link:https://github.com/Sunitsable/MERN-Stack-Todo-List**

Achievements

- Secured Rank 138 (out of 152k) and achieved a **99.**87 percentile in MHT-CET examination
